THE SECRETS THEY KEEP...

CARBON MONOXIDE
Car exhausts

NICOTINE
Pesticide

TOLUENE
Industrial solvent

DDT
Insecticide

Here is what the tobacco industry is hiding in cigarettes...

Cigarette smoke contains over 4,000 chemicals.

What's in a cigarette?

AMMONIA
Toilet cleaner

ARSENIC
White ant poison

BUTANE
Lighter fluid

HYDROGEN CYANIDE
Poison used in gas chambers

ACETONE
Paint stripper

CADMIUM
Car batteries

METHANOL
Rocket fuel

NAPHTHALENE
Moth balls

When someone smokes a cigarette, they breathe in chemicals such as carbon monoxide, ammonia, arsenic, naphthalene and hydrogen cyanide. Even if you don't smoke you can still be harmed by these poisonous chemicals just by being around people who are smoking.

Smoking is the largest cause of preventable death in the western world. The more cigarettes a person smokes the greater the risk of harm to their body.
